

Fresh Corner

Fresh Corner

A refreshing corner in the city, a privileged space protected from the sun's rays by enveloping vegetation; the 'Fresh Corner' furniture is an invitation to well-being and conviviality. Designed around a corner, inspired by the perfect balance between vegetation, stone and wood, the horizontal and vertical planes of the 'Fresh Corner' furniture create a protective environment for users, a green shaded island that is both intimate and open to the city.

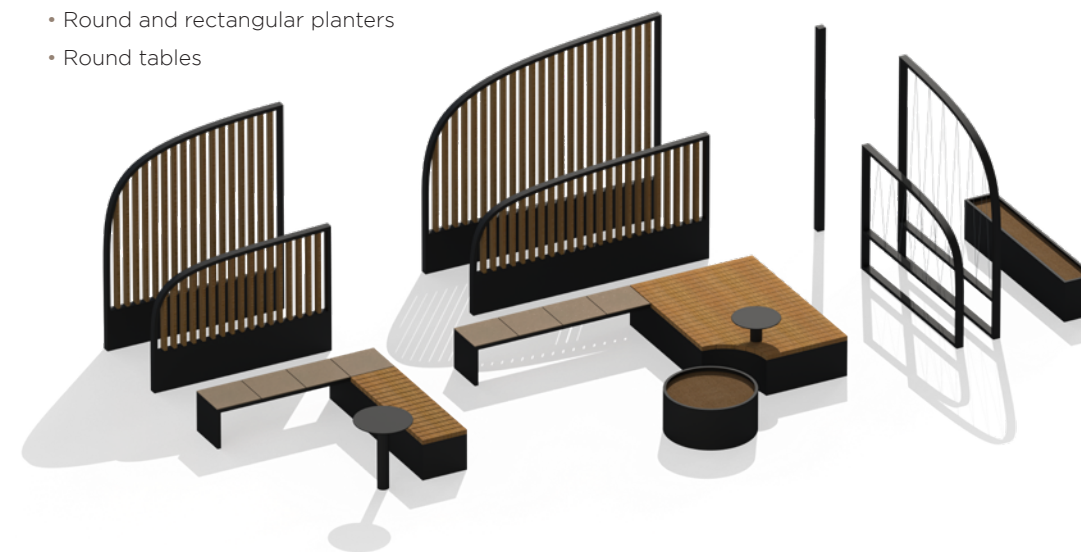

Furniture orientation relative to the sun

Position the furniture according to the sun's path so that the arches generate shade over the seating areas during the hottest times of the day.

Design principle of the Fresh Corner range

The modularity of the elements allows for both predefined or custom-made compositions:

- Arches for climbing plants
- Arches in openwork wood cladding
- Benches
- Platforms
- Round and rectangular planters
- Round tables

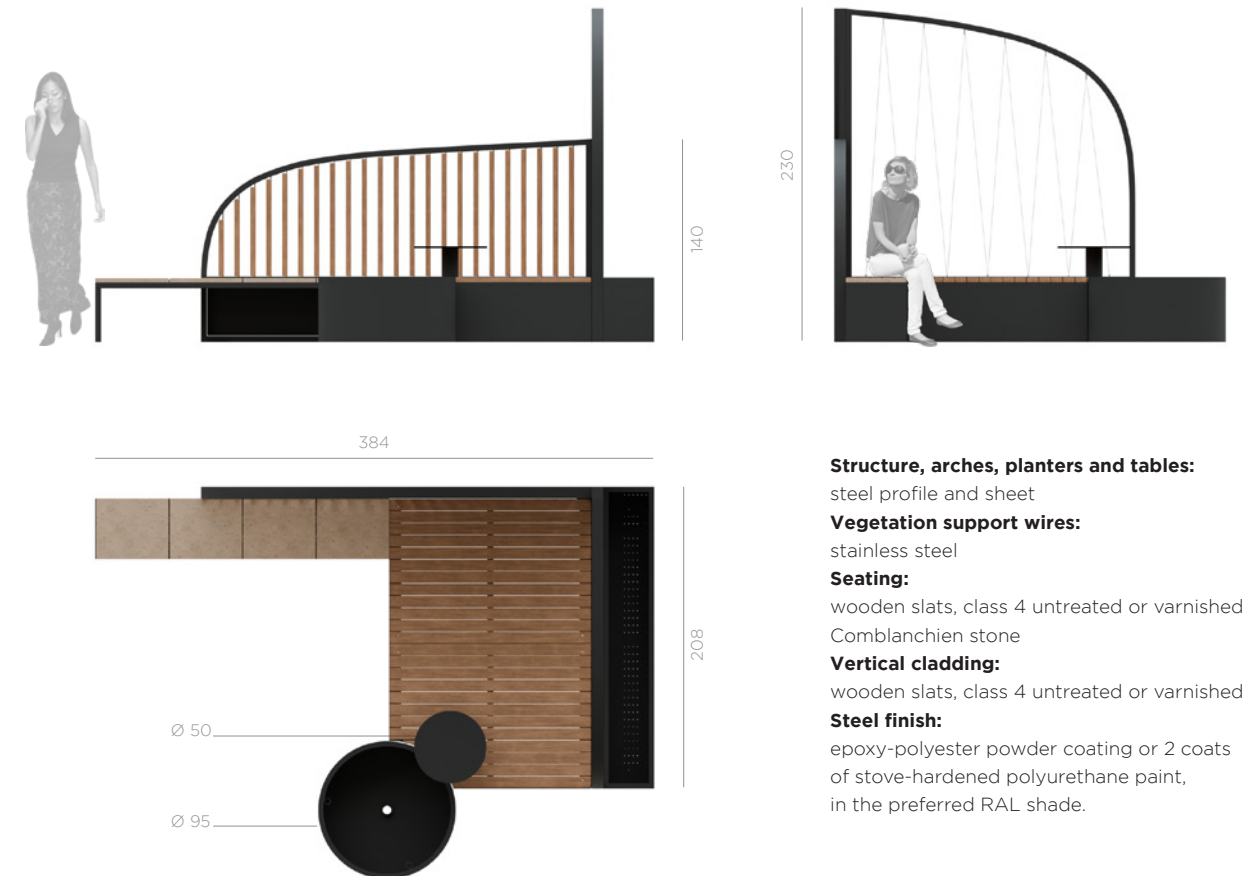

Fresh Corner

Association of two furniture elements: 'mixed composition' and 'low composition'. This configuration encourages social interaction and openness to the surrounding landscape.

The plant-covered arches capture the sun's rays to create a cool shade over the seating and resting areas. Essential materials like stone and wood enhance the natural character of these spaces.

Structure, arches, planters and tables:

steel profile and sheet

Vegetation support wires:

stainless steel

Seating:

wooden slats, class 4 untreated or varnished
Comblanchien stone

Vertical cladding:

wooden slats, class 4 untreated or varnished

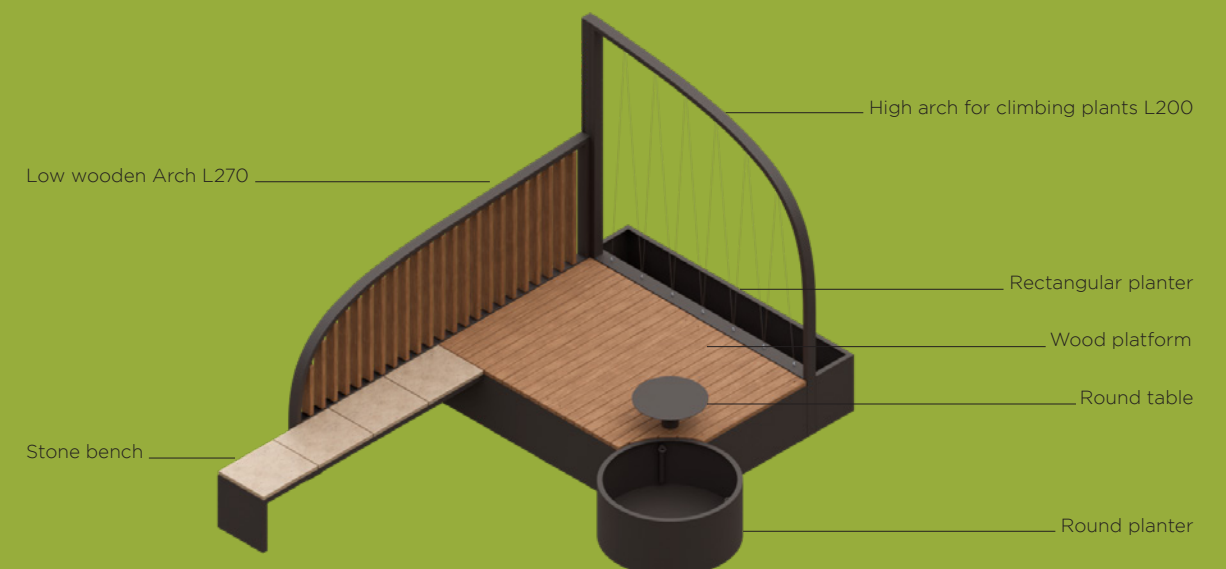

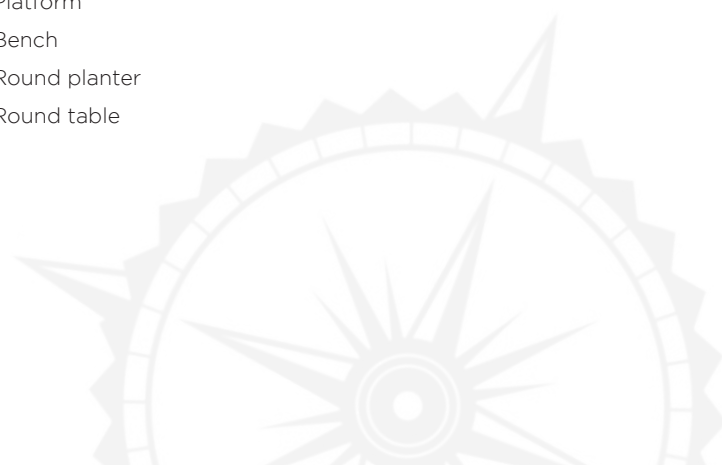

Steel finish:

epoxy-polyester powder coating or 2 coats
of stove-hardened polyurethane paint,
in the preferred RAL shade.

Fresh Corner

Mixed Composition:

- High vegetated arch
- Rectangular planter
- Low arch in openwork wood cladding
- Platform
- Bench
- Round planter
- Round table

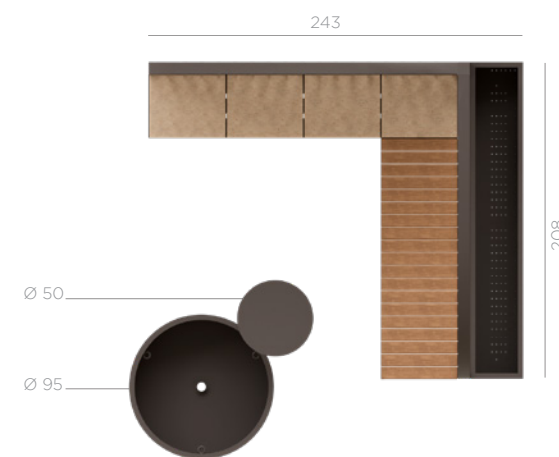

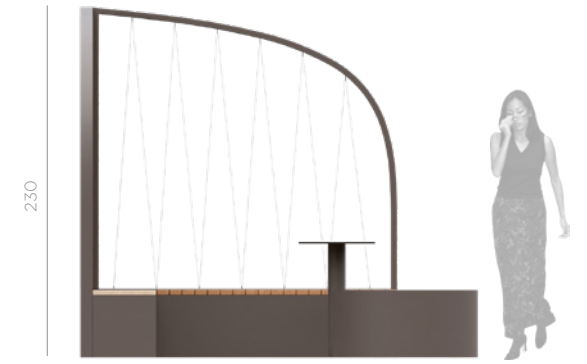

Fresh Corner

High Composition:

- High vegetated arch
- Rectangular planter
- High arch in openwork wood cladding
- L-shaped stone and wood bench
- Round planter
- Round table

Structure, arches, planters and tables:

steel profile and sheet

Vegetation support wires:

stainless steel

Seating:

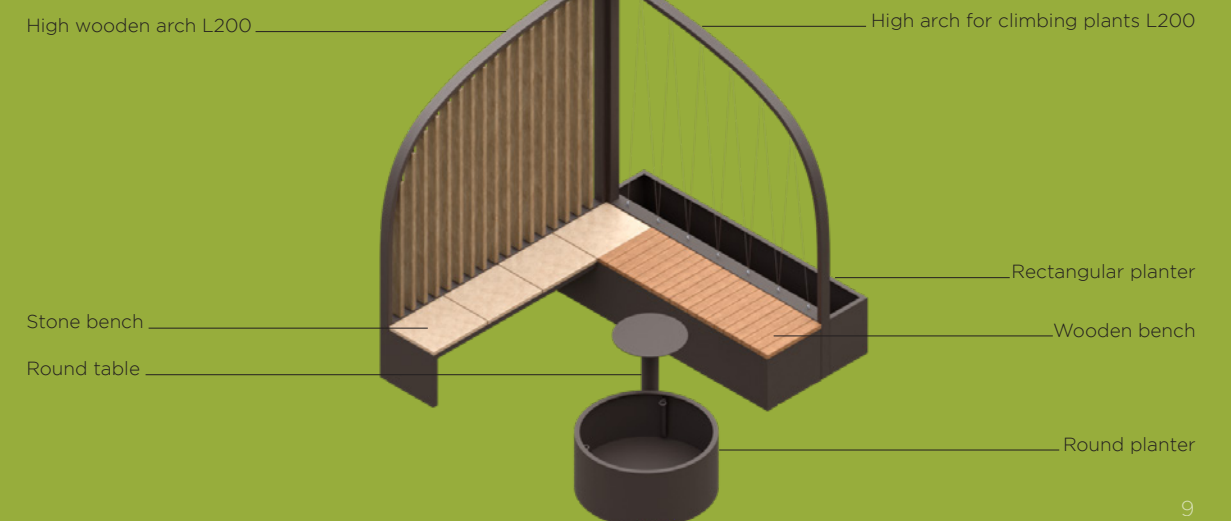

wooden slats, class 4 untreated or varnished Comblanchien stone

Vertical cladding:

wooden slats, class 4 untreated or varnished

Steel finish:

epoxy-polyester powder coating or 2 coats of stove-hardened polyurethane paint, in the preferred RAL shade.

Fresh Corner

Low Composition:

- Low vegetated arch
- Rectangular planter
- Low arch in openwork wood cladding
- L-shaped stone and wood bench

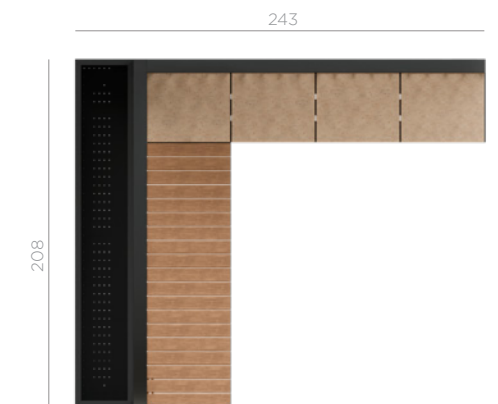

Structure, arches, planters and tables:
steel profile and sheet

Vegetation support wires:
stainless steel

Seating:
wooden slats, class 4 untreated or varnished
Comblanchien stone

Vertical cladding:
wooden slats, class 4 untreated or varnished

Steel finish:
epoxy-polyester powder coating or 2 coats
of stove-hardened polyurethane paint,
in the preferred RAL shade.
